

OdourLess sanitation liquid

Danfo recommends the use of OdourLess sanitation liquid with Wanto Mini.

A sanitation liquid helps to prevent unpleasant smells and the development of bacteria in the waste tank.

With sanitation liquid, even an infrequently emptied toilet will always smell pleasant when flushed.

Ecological sanitation

OdourLess is Danfo's sanitation liquid, developed especially for use with our products.

Since we are an eco management company, OdourLess is an ecological product, using natural components to cause materials to break down.

OdourLess is not harmful to the environment or people.

How to use OdourLess

Pour 1 litre of OdourLess and 10 litres of fresh water in the waste tank before starting to use the toilet and every time the tank has been emptied.

The waste will be mixed with clean water and sanitation liquid when the user flushes, preventing bad smells.

Never put sanitation liquid in the fresh water tank.

WANTO MINI

WANTO MINI - in use

Wanto Mini gives you access to hygienic, user-friendly sanitation - even where there is no running water.

Featuring separate, integrated tanks for fresh and waste water, it offers a comfortable toilet solution anywhere.

Wanto Mini is ideally suited for industrial use, in mines or by road crews.

Economical

Wanto Mini flushes like a normal WC, but uses very little water.

As a result, the toilet can be used many times before the tank containing water for the flushing mechanism needs to be replenished, making it an economical, low-maintenance solution.

And conserving natural resources is of course also good for the environment!

User-friendly

A metal lid at the base of the toilet bowl separates it from the waste tank except during flushing. This shields the user from any unpleasant sights or smells.

Wanto Mini comes with two installation points for ventilation.

Size and weight:

Height (sitting): 60 cm Weight: ca 20 kgs
Width: 70 cm Length: 70 cm

Waste tank 140 litres, fresh water tank 40 litres.

Simple to install, use and maintain

Durable material that repels dirt

Moulded in two pieces, the toilet is very durable. The dark grey colour repels and hides any dirt.

Easy to fasten

Wanto Mini is easily attached to the wall with a standard screw, making it easier to install and move than previously.

Screw-on lid with improved function

A new, screw-on lid for the waste tank means that Wanto Mini can now be transported without the risk of leaking.

Pump for flush

To flush, simply push down the pump on the upper part of the toilet.

As a safety device, Wanto Mini is delivered with the pump embedded. A quick hand movement activates it, until the toilet needs to be moved again.
