

LET IN 2006 Electronic Coin Box

An automatic coin box is a tireless doorman generating income that helps financing the maintenance of the toilet in restaurants, shopping centres, waiting rooms etc.

The coin box has an electronically controlled coin scanning feature for reliable operation and accepts simultaneously various types of coins of two different currencies as well as tokens.

- Robust
- Made of stainless steel
- Powder coated in beige or black
- Simple installation
- Reliable functions
- One coin slot for optional number of coins
- Change return
- LED indication green/red

 - automatic flush function
 - automatic lighting (see below)
- Easy to service

Options

- Compilation of paying visitors
- Lock case
- Electrical striking plate
- Transformer 24V stabilised
- Stainless steel fitting plate
- Tokens

Automatic lighting

Let In can be connected for automatic control of the toilet room lighting. The lighting is turned on only if the customer has paid the charge, and it goes out when the customer leaves the room, which helps prevent free uses between paying customers. This function also reduces costs for electricity and bulbs.

Technical data

Colour: Beige or black

Weight: 7,8 kg
