

MOBILE TOILET CABINS

- Technical specification

Construction

Walls and doors of sandwich construction of an insulated polyurethane core covered with plastic coated aluzinc sheet on both sides. Roof of galvanised steel plate with riveted edges. Floor and toilet seat in tank models are a single piece of fibre glass reinforced plastic polyester, seamlessly joined to the walls, with a ridge pattern surface to prevent slipping.

Equipment

All cabins are furnished with toilet paper holder, waste paper basket, clothes peg, mirror, locking device, and GFCI (ground fault circuit interrupter), as well as external eye bolts for lifting. Light fixture and heating. Wash basins with water tap in all except for Multi Toilet Wagon and Double Tank Cabin; in Tank Cabin wash basin is connected to 25 litre (6.5 gal) fresh water container with foot pump. WC Cabins contain ceramic toilet bowls.

Electrical installation

All models delivered with electrical installation for lighting and heating according to local regulations (AC 100-120 / 220-240). Max power consumption 60 W.

Ventilation

Disk valves for natural ventilation. Separate ventilation for waste tank.

Water Connection

WC and Accessible WC Cabins are connected to the mains water supply and sewerage.

Waste Tank

Made of rotomoulded plastic and integrated in the unit's structure, the waste tank withstands extreme temperatures. To be filled with water and disinfectant prior to use. Requires occasional drainage by sludge suction (see below).

Waste Tank Capacity

Model:	Tank Cabin	approx. 1600 visitors
	Double Tank Cabin	approx. 2000 visitors
	Toilet Wagon	approx. 1600 visitors
	Multi Toilet Wagon	approx. 2000 visitors

Wheel chassis

Multi Toilet Wagon: One-axeled wheel chassis of galvanised steel with brakes. Prepared for fitting of a 50 mm (2") tow hitch.

Toilet Wagon: Tank Cabins can be mounted on one-axeled wheel chassis of galvanised steel to form a Single Toilet Wagon. No brakes. Prepared for fitting of a 50 mm (2") tow hitch. Detachable towing fork.

Toilet Wagon

MOBILE TOILET CABINS

Mobile Toilet Cabins from Danfo

Fully insulated for use all year round, our high-quality mobile toilet cabins are available in several different models. The cabins come with integrated waste tanks or with water closets for connection to water and sewerage, depending on the needs of the customer. Mobility and ease of transport are common features to all models.

Because of their construction, mobility and the quality of the fittings Danfo's toilet cabins are ideally suited for use permanently or semi-permanently in a variety of locations such as golf courses, camping sites, construction and industrial sites, military operations and many others.

MODELS AND EXTERIOR PICTURES

Tank Cabin
Toilet cabin with 500 litre waste tank - for use anywhere.

WC Cabin
Cabin with WC - for connection to the mains water and sewerage.

Multi Toilet Wagon
Toilet cabin with wheeled chassis and four cubicles.

Toilet Wagon
Tank Cabin mounted on chassis.

Larger WC Cabin with full accessibility for disabled visitors. Customer supplies ramp for wheelchair access to the cabin.

Double Tank Cabin
Waste tank toilet cabin with two cubicles, one offering facilities and access for the disabled.

MOBILE TOILET CABINS

INTERIORS

WC Cabin

Furnished with a ceramic WC and a sturdy plastic wash basin, this model needs connection to mains water supply and sewerage.

Tank Cabin

With floor and toilet seat cast in a single piece of reinforced fibre glass composite, this model is very durable and easy to clean. The toilet is connected to a 500 litre integrated waste tank and there is also a wash basin with a separate 25 litre water supply.

Toilet Wagon

Interior as Tank Cabin, mounted on chassis for ease of transportation.

Double Tank Cabin

This model contains two separate cubicles, one with access and equipment for the partially disabled. Each cubicle contains a toilet with integrated waste tank fitted in reinforced fibre glass composite. Unlike the single tank cabin the cubicles do not contain wash basins.

Multi Toilet Wagon

Mounted on a wheel chassis, this model offers four separate cubicles with reinforced fibre glass composite interior. The toilets are connected to an integrated waste tank. The cubicles do not contain wash basins.

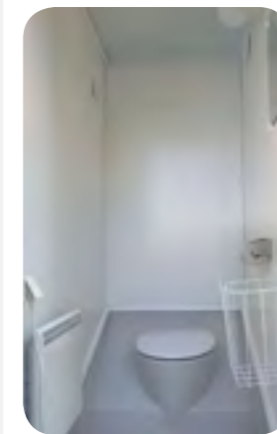

Accessible WC Cabin

This model contains a single, larger cubicle for disabled visitors. Furnished with a ceramic WC, drop down grab rails, a sturdy wash basin, two clothes pegs, extra mirror, waste basket and baby change table the accessible WC cabin needs connection to the mains water supply and sewerage.
